Why Choose Canton Architectural Products?

We offer a standard line of cabs available with several different designs and finishes, or we will build your custom design to order from plans and specifications. Stainless steel, bronze, glass, wood veneer, custom millwork, marble and granite are just some of the materials available.

Many of the nation’s leading elevator contractors put their trust in Canton Architectural Products to supply superior-quality elevator cabs at competitive prices. Our services include cabs for new construction, cabs and cab components for modernization or repair, and design and value engineering consultation.

Design and Quality Features

- **Every cab is fully assembled, erected and subjected to a thorough inspection process prior to shipping**
- **All cabs are engineered using 3D modeling software**
- **All cabs are ASME A17.1 code compliant**
- **All steel wall and canopy panels come standard with a durable powder-coated finish**
- **All side walls, canopies and ceilings are packed and shipped pre-assembled for quick and simple assembly in the field**
- **All lighting is mounted, pre-wired and tested prior to shipping to save additional field labor**
- **Canopy panels are fabricated from 12 gauge steel**
- **Steel walls, entry posts and transoms are fabricated from 14 gauge steel**

Call today for a free, no-obligation consultation. We welcome the opportunity to show you why Canton Architectural Products is your best choice for elevator cabs of uncompromising quality.
